Roman Idov *Software Engineer*

Phone: 054-5585569
Profile: http://www.linkedin.com/iro1977
Residential area: Israel, Haifa
Email: iro1977@gmail.com

Looking for an interesting in challenging position in Software Engineering field.
Sharp, Top-Producing Software Engineer with over 18 years' experience providing programming and database expertise. Forward-thinking problem identification, research, analysis, and resolution. Spearheads full life-cycle project development and innovatively manages quality assurance. Consistently delivers strong and sustainable technology gains. Organizational driver offering productivity improvements, pioneering technologies, and process redesign and reengineering. Distinguished performance driving innovation with expertise in .NET C# programming language.

Technical Proficiencies

In-depth knowledge in Microsoft **.NET Framework** 1.1/2.0/3.0/3.5/4.0/4.5/4.7/5, **.NET Core**. Extensive knowledge in **C#**, Visual C++, CLI/C++, Qt C++ (including QML), **Phyton** scripting.
In-depth knowledge in IDEs like Visual Studio 2005/2008/2010/2012/2015/2019/2022. Basic knowledge in Eclipse.

- **UI**: Windows Forms, WPF 4.0/4.5, Silverlight 4.0/5.0. Writing & Maintaining complicate UI using Composite Application pattern implementations like PRISM/Caliburn Micro. Styles and templates for WPF build-in and custom controls using Visual States, Behaviours, Triggers and Storyboards
- **Design Patterns:** Among other using Container implementations of IoC/DI like MEF, Unity, Spring.NET and Castle Windsor. WPF oriented design patterns like MVVM and MVPVM. Using OOP and OOD
- **Multithreading:** Worker Threads, Synchronization, Marshalling to UI Thread, Background Worker, Task-based programming.
- **Communication:** WCF/WCF RIA Service, WCF DataServices. REST.
- **Windows:** Windows IIS 7.5: Installation, Creation and Configuring including from command line (batch files). Maintena nce of Application Pools, Web Sites and Web Sites Applications. Windows Services: Creation and Installation.
- **ORM:** Entity Framework 4.0/4.1/5.0, NHibernate
- **Data Bases:** Microsoft SQL Server: Installation & Configuring. Creation & Maintenance of Schema (Tables, Views, Store d Procedures, Queries, Indices, Triggers). ORACLE Database: Installation & Configuring. Writing Queries. Using Red Get "Development Suit for ORACLE" for comparing schemas and data, finding differences and generating scripts
- **Third Party:** DevExpress, ComponentOne, Actipro, Infragistics, Syncfusion, Xceed, Telerik.
- **Map Tools**: ESRI (ArcGIS), Tiltan (ILX)
- **Tests:** Writing Unit Tests with NUnit and MS VS Test tools
- **UML:** Use Case Diagram, Activity Diagram, Sequence Diagram, Class Diagram, State Charts.
- **Using planning tools**: Jira, Enterprise Architect, Visual Paradigm, Rational Rose.
- **Deployment tools:** GitLab, GitHub, Jenkins.
- **Source control tools:** MS TFS, Git, SVN.
- **AI:** Claude Code (Haiku, Sonnet, Opus), ChatGPT Codex, GitHub Copilot. Creating AI agents for planning, building archit ecture, coding, code review and writing documentation.
- **Portfolio:** https://github.com/Startrek1977?tab=repositories

Professional Experience

Senior Software Developer – GE HealthCare
2021 - Present

- Design and develop **desktop control application** for medical ultrasound systems.
- Work primarily with **C#** and **C++**, using **WPF** for the front end and **MS SQL** for data management and integration.
- Implement new features and enhancements following **OOP principles**, **design patterns**, and **.NET Framework/Core** standards. Writing **Python** scrips for internal use.
- Utilize **AI-assisted development tools** to accelerate coding, improve quality, and streamline troubleshooting.
- Collaborate with software developers, system engineers, and UI/UX designers to deliver a **robust, scalable, and intu itive application** that enhances diagnostic accuracy and clinical workflow efficiency.

Design/Product Development Engineer – BIOSENSE (on behalf of Conkor)
2016 – 2021

- Developed **desktop control application** for medical cardiovascular equipment.
- Built the front end using **WPF** with **MVVM**, handling **multithreading** for smooth and responsive user interfaces.
- Worked with **C# 4.5** on the **.NET Framework** and **Microsoft SQL Server** for back-end data management.
- Designed and maintained software components following **UML** principles, ensuring clear architecture and maintain ability.
- Created and executed tests using **MS Visual Studio Test tools** to ensure reliability and quality.
- Collaborated with cross-functional teams including developers, engineers, and QA specialists to deliver a **robust app lication** that supports clinicians in cardiovascular diagnostics.

Software Developer – RAFAEL (on behalf of mPrest)**, Command and Control Department**
2013 – 2016

- Developed desktop **Mission Planning System** application **(Command and Control)** for critical defence system.
- Built the **front-end using WPF** with **MVVM**, implementing multithreading for responsive and reliable interfaces.
- Worked with **C# 3.0/3.5** on the **.NET Framework**, **Oracle** for database management using **NHibernate** as ORM imp lementation, and **Tiltan (ILX)** as a **GIS** implementation.
- Designed software components and architecture using **UML.**
- Created web services using **WCF.**
- Used **Prism** as an application framework, ensuring maintainability and scalability.
- Developed and executed tests with **MS Visual Studio Test tools** to guarantee high reliability and quality.
- Joint effort with developers, engineers, and system integrators under a **top-secret security clearance** to deliver se cure, mission-critical application.

Software Developer – ASTEA
2008 – 2013

- Developed **CRM products** and **Data Quality applications** on both client and server sides.
- Built the **front-end using WPF** and implemented back-end logic with **C# 3.0/3.5** on the **.NET Framework**.
- Managed and queried data using **Microsoft SQL Server**, ensuring reliable and efficient data processing.
- Played an active role in shaping application features and workflows that directly improved clients' data manageme nt and operational effectiveness.

Software Developer – RAFAEL (on behalf of Korentec), Command and Control Department
2005 – 2008

- Developed **Command and Control applications** for critical defence systems under a **top-secret security clearance**.
- Built the **front-end using Windows Forms** and implemented back-end logic with **C# 2.0** on the **.NET Framework**.
- Managed data and performed queries using **MS SQL Server**, and integrated **GIS** functionality using **Tiltan (ILX)** and **ESRI (ArcGIS)**.
- Applied **UML** for software design and **NUnit** for testing to ensure reliability and maintainability.
- Contributed to application features that supported mission-critical operations and enhanced situational awareness for command and control teams.

Professional Education

- **Braude College** *(Dean's list at semesters 2 and 4)* GPA 85 2003 - 2006
  B.Sc. in Software Engineering
- **University of Haifa** GPA 89 1995 - 1999
  B.Sc. in Physics and Math
- **Teaching Certificate** in Mathematics and Physics in post-primary and secondary schools
- **Teaching Certificate** in Computer Science in secondary schools

Military Service

Captain in reserve	IDF, Air Forces, Tech. Officer	1999 - 2003

Languages

English – excellent, Hebrew – excellent, Russian - native

Hobbies

Motorcycling, basketball, flying drones.
